PROCESS

The natural dying process Eyand, ecologic yarn and natural dye, is the result of years of research to achieve the highest sustainable textile production standards.

C02

eyand[®]
Earth

Our unique finishings process is made with organic molecules and natural fats, and extends the “lifetime” of the garments making them more durable and sustainable.

The color card currently offered by eyand earth is divided in eight major groups of shades:

COLOR CARD

Yellows, formulated with limonite base.

Oranges, formulated with limonite and Hematite base.

Reds and roses, formulated with hematite base.

Brown and beige, formulated with a mixed base of oligisto, limonite, hematite and magnetite.

Blue and lilac, formulated with silicate base.

Green, formulated with eskolaita base.

Black and grey, formulated with magnetite base.

Matte white, formulated through an oxygenation treatment.

The color card currently offered by eyand earth is divided in seven major groups of shades:

COLOR CARD

True to our philosophy of evolution and development of natural garments, we continue to innovate in the use of natural elements. **Eyand Green was created of tremendous efforts and innovation.**

Eyand green expands the range of available colors offered by eyand earth and adds new shades to our collection, **using colors of vegetable origin extracted from roots, bark and fruit rinds, among others.**

An aerial photograph of a coastal landscape. A river delta flows into a body of water, creating a large, irregular island. The water is a deep blue-green, and the land is a mix of green vegetation and brownish-grey soil. The overall scene is captured from a high angle, showing the intricate patterns of the water and land.

eyand[®]
livEarth

Our unique finishings process is made with organic molecules and natural fats, and extends the “lifetime” of the garments making them more durable and sustainable.

LIVEARTH

For us, research and development is a continuous process and the key to our success. Therefore, our goal is to continue experimenting with new color mixtures, interlacing elements of the inner earth with elements of the living earth, and giving rise to a third range called eyand livEarth.

LivEarth will offer even more colors of different shades and hues, using the natural resources the earth gives us without contamination.

C04

What we do

Fabrics

100%

Our fabrics are made of organic or recycled cotton, and from natural, artificial or synthetic fibers.

FABRICS

All of our natural or recycled fibers are Certified and are organically grown, without pesticides or other chemicals.

We take advantage of discarded fabrics and garments by harvesting their yarns to give them new life, thus reducing large amounts of waste.

C04

What we do

Dyeing

100%

Our dyeing process is 100% natural, without the use of chemical products.

DYEING

The coloring or printing is done with **natural dyes that come from the earth.**

The eyand dyeing process guarantees the absence of chemical products.
We are certified by GOTS and Oeko-Tex.

C04

What we do

Garments **eyand**®

Naturally styled.

100%

The final result is a 100% natural garment.

GARMENTS

We offer clothing manufacturing services starting with designs provided by clients and brands.

The **eyand label** guarantees a natural dyeing process.

C05

*“Our goal is to
make the entire
manufacturing
process 100%
sustainable.”*

100% Sustainable Fashion

OUR GOAL

Unlike conventional processes, the eyand dyeing process does not discharge any contaminated water into the environment.

We are working on a process to reuse 50% of the water, in order to reduce consumption and achieve a sustainable circular circuit.

Our goal for 2021 is that a significant part of the energy consumed in our factory comes from renewable sources.
